# Geis wins gold and silver in IDS quality comparison

Bad Neustadt / Kleinostheim, 9 April 2024.

**Double success for the Geis Group: Before moving to its new location in Ebersdorf, Geis Bischoff Logistics in Lichtenfels won the latest quality ranking of the general cargo cooperation IDS. Hans Geis GmbH + Co KG from Kürnach took second place in the quality comparison of all 54 IDS locations.**

To determine the quality winner, Germany's largest general cargo cooperation evaluates its partner depots annually in terms of their service quality. In addition to factors such as the fulfilment of delivery promises for incoming consignments, the completeness of scans and the delivery quality of express consignments, the results of regular quality audits are also considered.

### **Top positions once again**

Overall winner Geis Bischoff Logistics from Lichtenfels is at the top of the podium for the first time after finishing second last year. "Closing our old location in Lichtenfels as the winner makes us very proud. At the same time, we are taking this excellent result with us to our new location in Ebersdorf as a challenge for ourselves," says Jörg Krasulsky, Forwarding Manager at Geis Bischoff Logistics Lichtenfels. "Our consistent quality management and our constant endeavours to provide the best possible service every day, to regularly put all processes to the test and to continuously improve the qualifications of our employees are reflected in this result."

**Global Logistics**

The same applies to Hans Geis GmbH in Kürnach, which improved from third place last year to silver. Thanks to its consistently high-quality performance, the Geis team from Kürnach has been on the IDS winners' podium for the ninth time in a row.
